

Chapter Four: The First New Zealand Pattern Books

- Figure 4.1. George Findlay's *Illustrated Catalogue* March 1874 showing his older premises. The confused aerial and ground level perspectives of the front and rear buildings suggest an earlier lithograph had been updated by printer Samuel Lister.4
- Figure 4.2. Findlay's new two storey premises redrawn by Lister for Craig & Gillies' *Illustrated Catalogue*, July 1875.4
- Figure 4.3. Craig & Gillies' old George Street premises in 1874 near the Octagon. Photo Burton Bros.; collection: Museum of New Zealand Te Papa Tongarewa..5
- Figure 4.4. Craig & Gillies' *Illustrated Catalogue* (July 1875) featuring Thomas George's lithograph of their new premises.5
- Figure 4.5. Dunedin printer Samuel Lister.6
- Figure 4.6. Inconsistent artwork suggested Craig & Gillies' designs came from probably five separate sources. The lower table, #99 ½ A, is almost certainly Lister's own handiwork and his bizarre numbering sequences reflected late additions during the catalogue's compilation.6
- Figure 4.7. Findlay's 'Turnery' page (*left*) and Craig & Gillies' 'Turnery' page (*right*). Re-traced and re-drawn by Lister, it exposed his unfamiliarity with furniture design while suggesting that the original lithographic stone image had been lost.7
- Figure 4.8. A lithographic stone with inking roller and tympan press.7
- Figure 4.9 Jenks and Holt chiffonier images (*left*) lithographically transferred by Lister for Craig and Gillies' *Illustrated Catalogue* (*right*). Lister redrew the bottom right chiffonier from an identical pattern sheet to the 'Cranwell sheet' found in Auckland.8
- Figure 4.10 'Sideboard', John Dwyer Designs for Furniture (1856), (*left*). Dwyer's pattern in Jenks & Holt's *Modern Furniture; Original and Select, Plain and Decorative* (1869), (*middle*). 'Sideboard', republished in Wyman's *Furniture Gazette* (9 October 1880), (*right*)8
- Figure 4.11. Jenks & Holt, *Modern Furniture* (1869) illustrating patterns for a mahogany suite.9
- Figure 4.12. Jenks & Holt's mahogany chair imported by Craig and Gillies. Its rimu corner stays indicated it had been imported unassembled. Craig & Gillies' *Illustrated Catalogue* and *Price List* offered other Jenks and Holt furniture in native timbers suggesting they preferred to manufacture locally.9

- Figure 4.13. C. & R. Light *Registered Designs* (1880) chiffonier/credenza cabinets (*top left*). Craig & Gillies' *Illustrated Catalogue* chiffonier adapted by Lister from C. & R. Light's patterns (*above left*). An extremely rare rimu credenza manufactured from a British catalogue (*above right*)..... 10
- Figure 4.14. Cranwell's sheet overlaid onto Craig & Gillies' catalogue illustrates Lister's use of traced lithographic transfers to copy many designs (*left*). A mahogany and kauri Christchurch-made chiffonier is indistinguishable from any British imported equivalent (*right*). 10
- Figure 4.15. Images in Craig & Gillies' *Illustrated Catalogue* suggested nearly 50 designs from one source other than Jenks & Holt. Lister's tracing (*left*), though poor in quality, was identical in size to Cranwell's sheet (*right*). 11
- Figure 4.16. Henry Fielder's copy of C. & R. Light's *Registered Designs* showing cabinetmaker annotations indicating it was used as a pattern book from which to manufacture colonial furniture..... 11
- Figure 4.17. Craig & Gillies' catalogue reproduced a selection of material by different artists. Chairs patterns #4 and #5 were printed from electrotypes blocks supplied by American manufacturers. Commonly electrotypes were taken from wood engravings 12
- Figure 4.18. The British chair #17(*left*) has been drawn freehand with random line shading while the American chair #19A shows the rigidity of a wood engraving (*right*)..... 12
- Figure 4.19. Jenks & Holt's original patterns from 1869 (*left*), and redrawn in Wyman's *Furniture Gazette* in 1880 (*right*). Although Jenks & Holt's designs had been registered trade magazines, such as Wyman's, could reproduce such designs without restriction. 13
- Figure 4.20. Lister's anastatic copy taken directly from Jenks & Holt's design in Fig. 4.19. Craig & Gillies offered to this desk make in cedar, kauri and mahogany (*left*). The Jenks & Holt desk made in mahogany (*right*). 13
- Figure 4.21. The 1863 *Illustrated London News* woodcut of Dunedin reproduced in London from William Meluish's photograph (*top*). North & Scoullars' second premises on the Shakespeare Hotel site c.1868 (*bottom*); Burton Brothers' photograph, collection: Hocken Library, F18/12..... 14
- Figure 4.22. 'Office Furniture', Jenks & Holt *Modern Furniture* (1869). 15
- Figure 4.23. 'Stand for Copying Press' anastatically copied by Lister for Craig & Gillies' (1875) from the original Jenks & Holt design (1869) (*left*). The same design redrawn for the *Furniture Gazette* (1880) (*middle left*). Wyman's copy redrawn by Peter McIntyre for North & Scoullar (c.1883) (*middle right*). Wyman's copy redrawn by Herman Clarke for Thomson, Bridger & Co. (c.1887) (*right*)..... 15

- Figure 4.24. Wyman's *Furniture Gazette* made designs freely available to the cabinetmaking trade 16
- Figure 4.25. Wyman's *Furniture Gazette* designs redrawn by Peter McIntyre for North & Scoullar's *Illustrated Catalogue* (c.1883). 16
- Figure 4.26. G. & H. Story *Designs of Furniture* (1865) pattern for a 'lady's chair' and North & Scoullar's later copy (c.1883) (*top left & right*). Scoullar & Chisholm's beadwork and ebonised kauri 'lady's chair' (c.1900) with a similar example in an Auckland drawing room (c.1900) (*bottom left & right*). 17

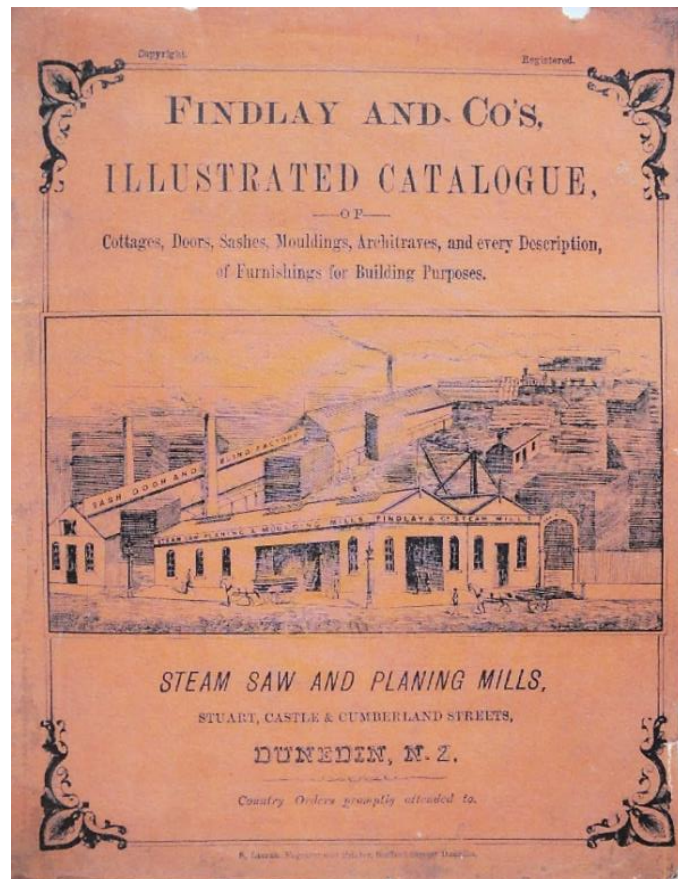

Figure 4.1. George Findlay's *Illustrated Catalogue* March 1874 showing his older premises. The confused aerial and ground level perspectives of the front and rear buildings suggest an earlier lithograph had been updated by printer Samuel Lister.

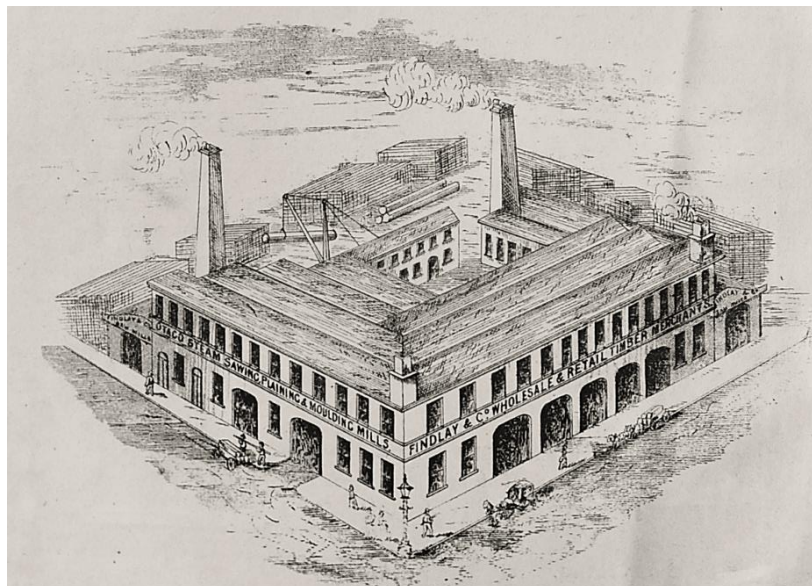

Figure 4.2. Findlay's new two storey premises redrawn by Lister for Craig & Gillies' *Illustrated Catalogue*, July 1875.

Figure 4.3. Craig & Gillies' old George Street premises in 1874 near the Octagon.
Photo Burton Bros.; collection: Museum of New Zealand Te Papa Tongarewa.

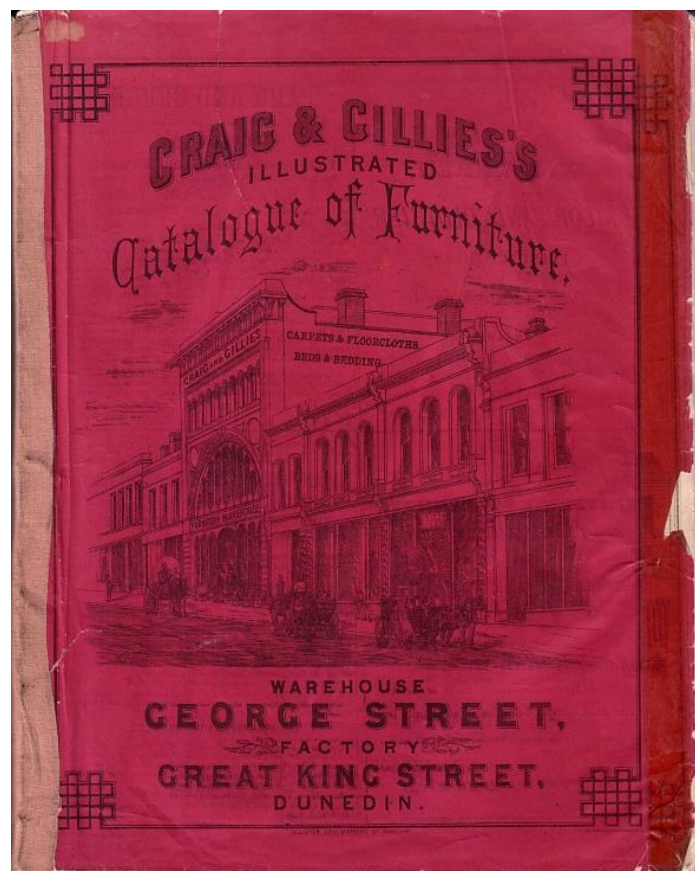

Figure 4.4. Craig & Gillies' *Illustrated Catalogue* (July 1875) featuring Thomas George's lithograph of their new premises.

Figure 4.5. Dunedin printer Samuel Lister.

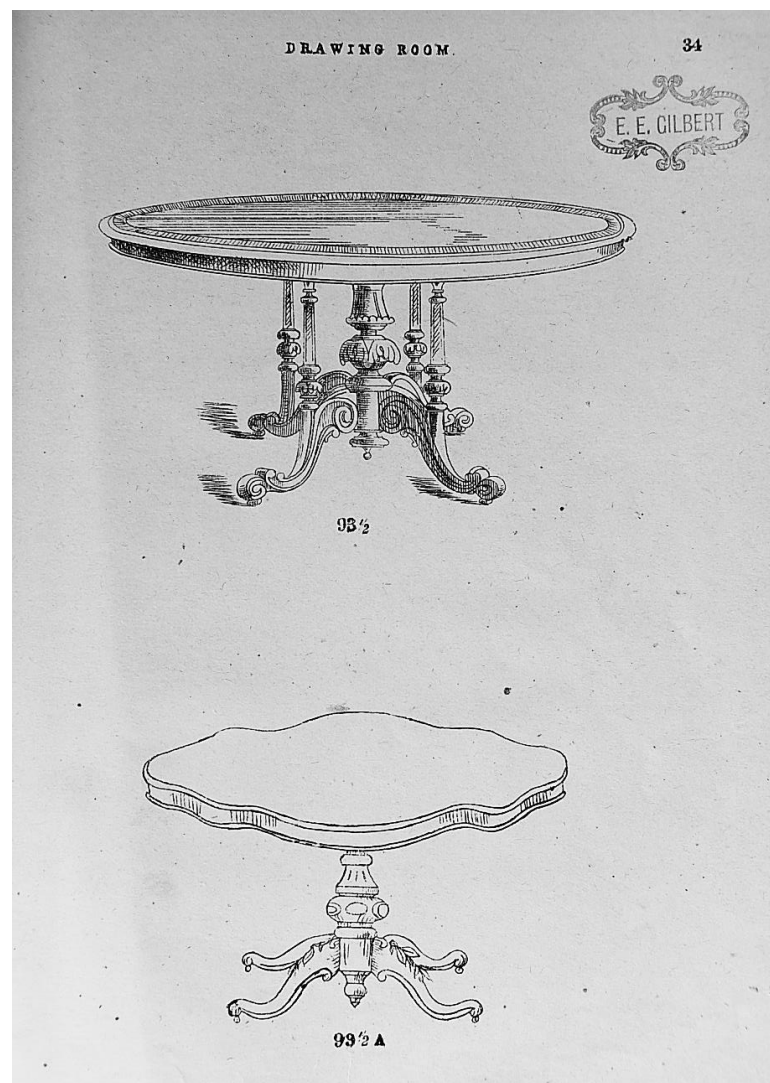

Figure 4.6. Inconsistent artwork suggested Craig & Gillies' designs came from probably five separate sources. The lower table, #99 1/2 A, is almost certainly Lister's own handiwork and his bizarre numbering sequences reflected late additions during the catalogue's compilation.

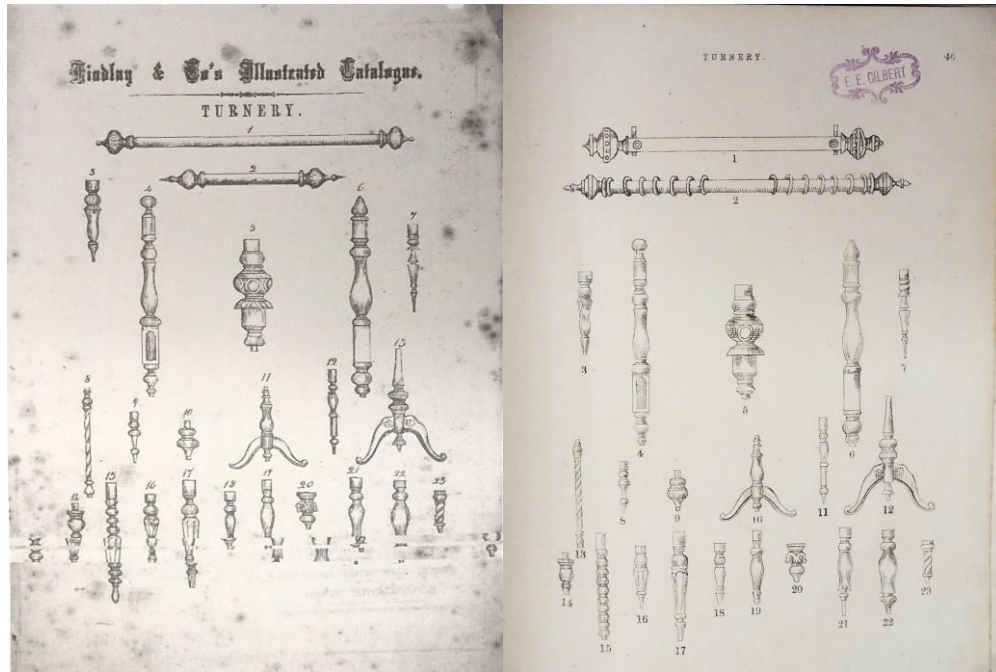

Figure 4.7. Findlay's 'Turnery' page (*left*) and Craig & Gillies' 'Turnery' page (*right*). Re-traced and re-drawn by Lister, it exposed his unfamiliarity with furniture design while suggesting that the original lithographic stone image had been lost.

Figure 4.8. A lithographic stone with inking roller and tympan press.

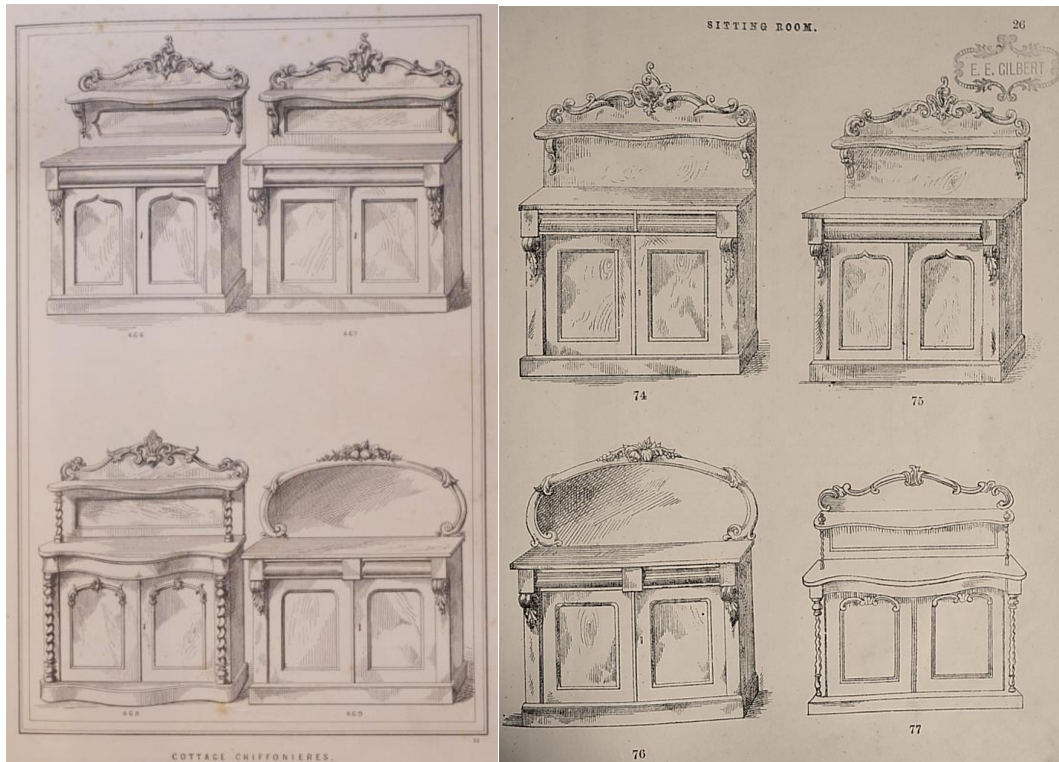

Figure 4.9 Jenks and Holt chiffonier images (left) lithographically transferred by Lister for Craig and Gillies' Illustrated Catalogue (right). Lister redrew the bottom right chiffonier from an identical pattern sheet to the 'Cranwell sheet' found in Auckland.

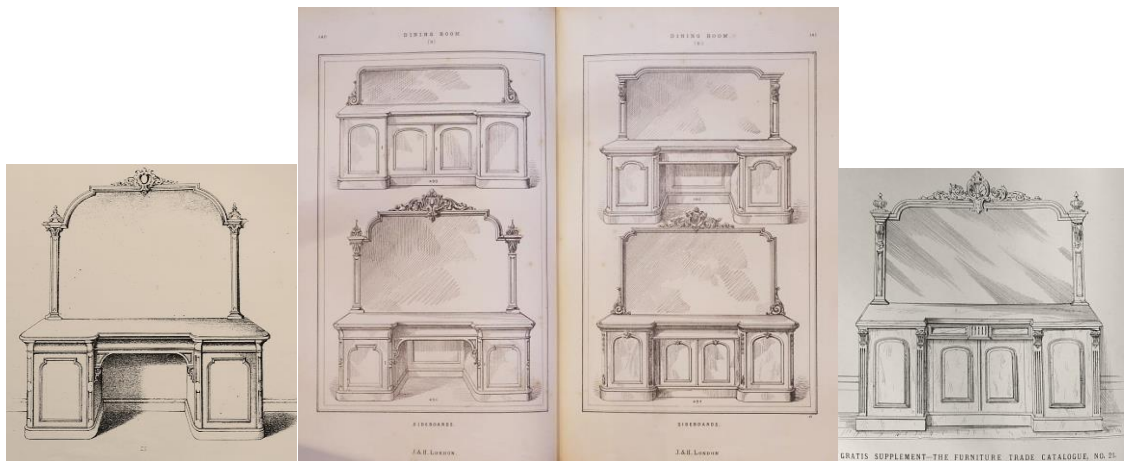

Figure 4.10 'Sideboard', John Dwyer Designs for Furniture (1856), (left). Dwyer's pattern in Jenks & Holt's Modern Furniture; Original and Select, Plain and Decorative (1869), (middle). 'Sideboard', republished in Wyman's Furniture Gazette (9 October 1880), (right)

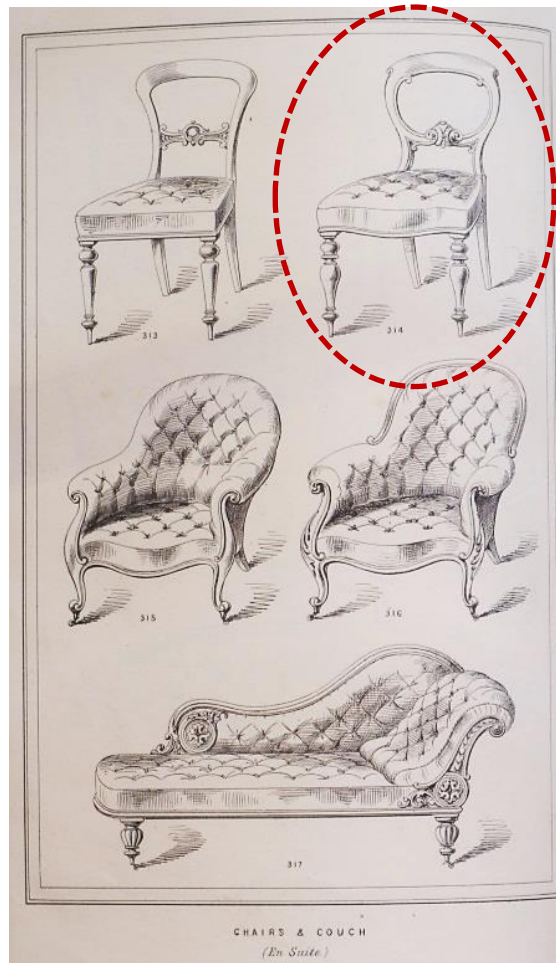

Figure 4.11. Jenks & Holt, *Modern Furniture* (1869) illustrating patterns for a mahogany suite.

Figure 4.12. Jenks & Holt's mahogany chair imported by Craig and Gillies. Its rimu corner stays indicated it had been imported unassembled. Craig & Gillies' *Illustrated Catalogue and Price List* offered other Jenks and Holt furniture in native timbers suggesting they preferred to manufacture locally.

Figure 4.13. C. & R. Light *Registered Designs* (1880) chiffonier/credenza cabinets (*top left*). Craig & Gillies' *Illustrated Catalogue* chiffonier adapted by Lister from C. & R. Light's patterns (*above left*). An extremely rare rimu credenza manufactured from a British catalogue (*above right*).

Figure 4.14. Cranwell's sheet overlaid onto Craig & Gillies' catalogue illustrates Lister's use of traced lithographic transfers to copy many designs (*left*). A mahogany and kauri Christchurch-made chiffonier is indistinguishable from any British imported equivalent (*right*).

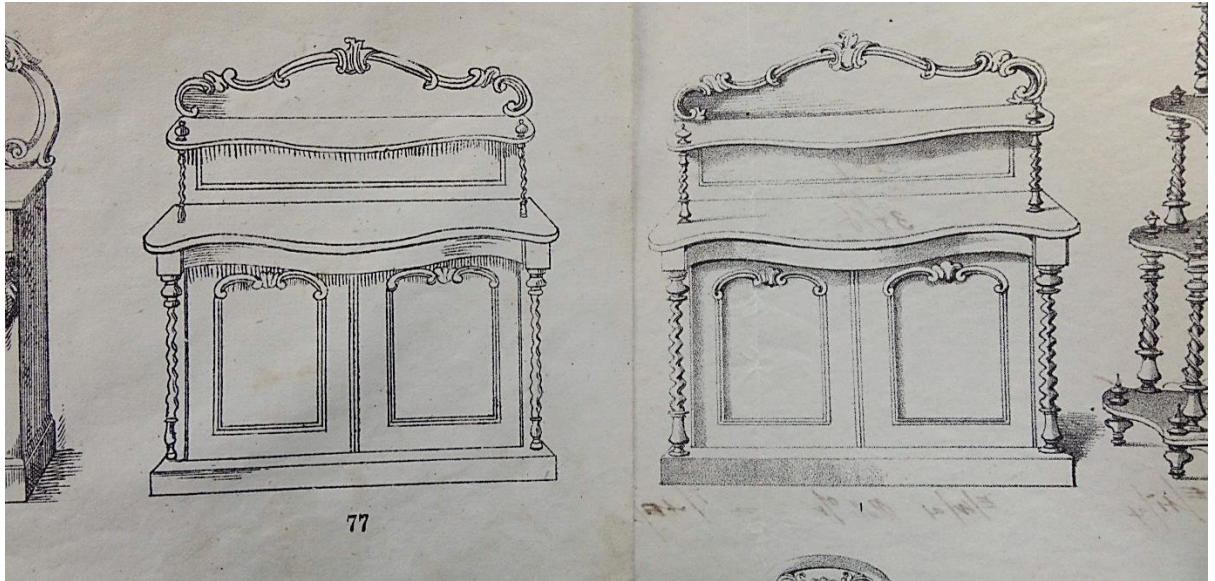

Figure 4.15. Images in Craig & Gillies' *Illustrated Catalogue* suggested nearly 50 designs from one source other than Jenks & Holt. Lister's tracing (left), though poor in quality, was identical in size to Cranwell's sheet (right).

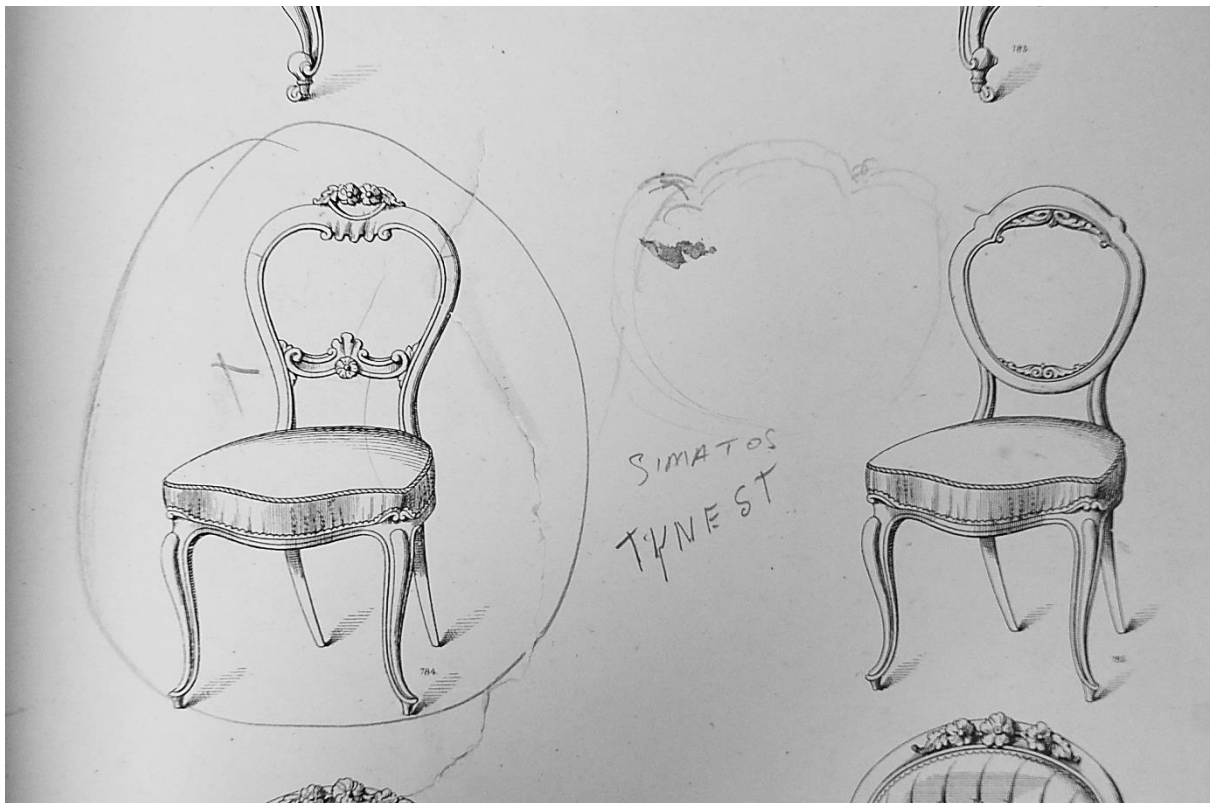

Figure 4.16. Henry Fielder's copy of C. & R. Light's *Registered Designs* showing cabinetmaker annotations indicating it was used as a pattern book from which to manufacture colonial furniture

Figure 4.17. Craig & Gillies' catalogue reproduced a selection of material by different artists. Chairs patterns #4 and #5 were printed from electrotpe blocks supplied by American manufacturers. Commonly electrotpes were taken from wood engravings

Figure 4.18. The British chair #17(*left*) has been drawn freehand with random line shading while the American chair #19A shows the rigidity of a wood engraving (*right*).

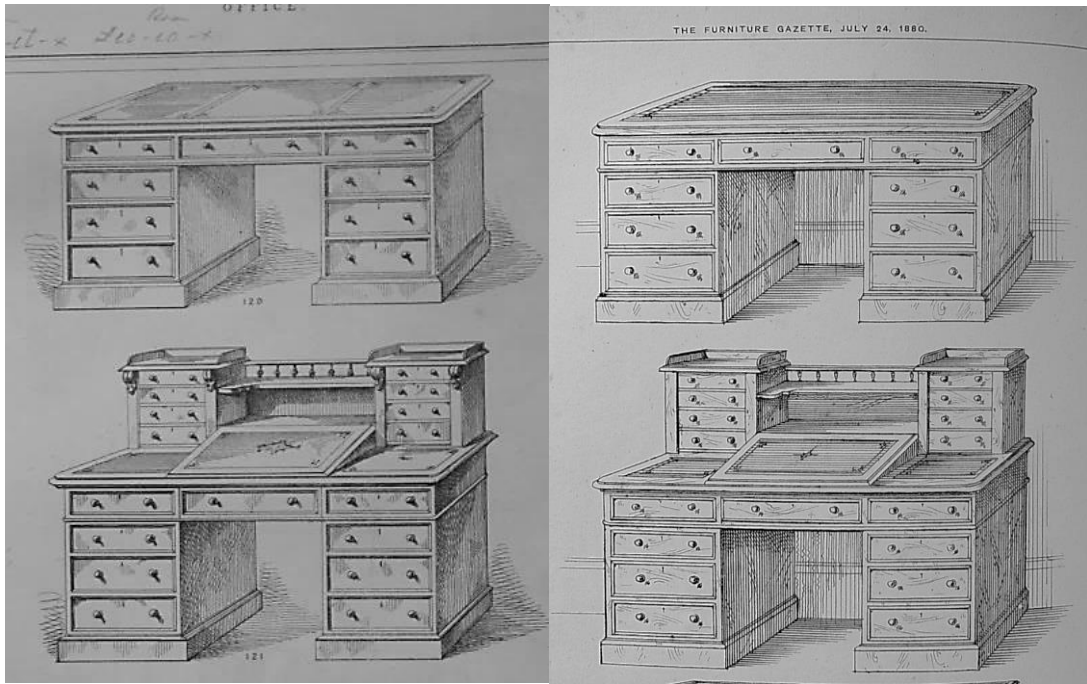

Figure 4.19. Jenks & Holt's original patterns from 1869 (*left*), and redrawn in Wyman's *Furniture Gazette* in 1880 (*right*). Although Jenks & Holt's designs had been registered trade magazines, such as Wyman's, could reproduce such designs without restriction.

Figure 4.20. Lister's anastatic copy taken directly from Jenks & Holt's design in Fig. 4.19. Craig & Gillies offered to this desk make in cedar, kauri and mahogany (*left*). The Jenks & Holt desk made in mahogany (*right*).

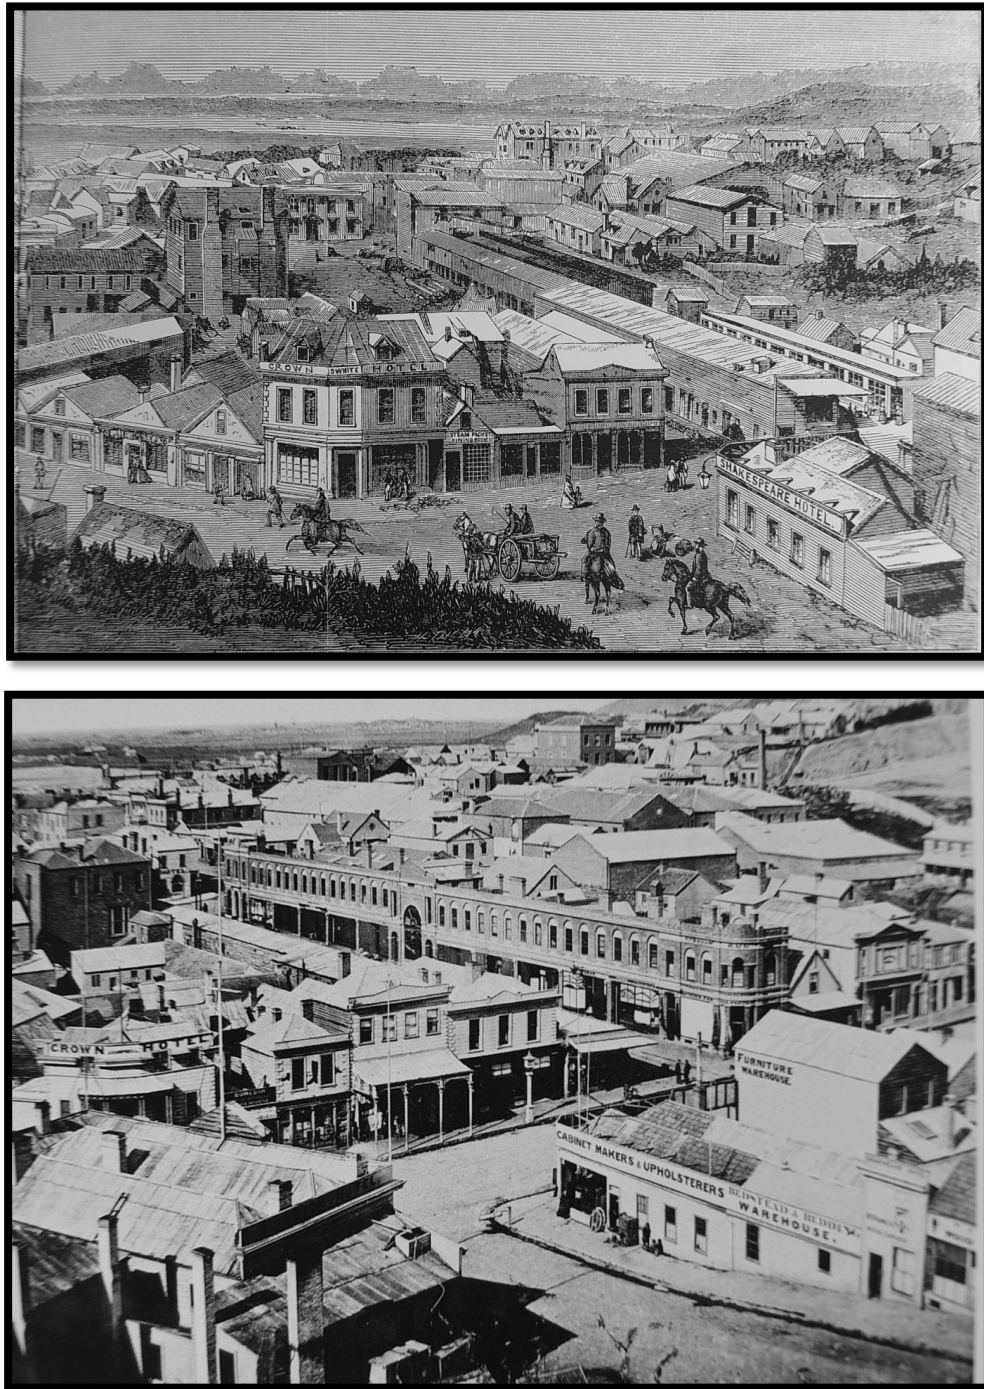

Figure 4.21. The 1863 *Illustrated London News* woodcut of Dunedin reproduced in London from William Meluish's photograph (top). North & Scoullars' second premises on the Shakespeare Hotel site c.1868 (bottom); Burton Brothers' photograph, collection: Hocken Library, F18/12.

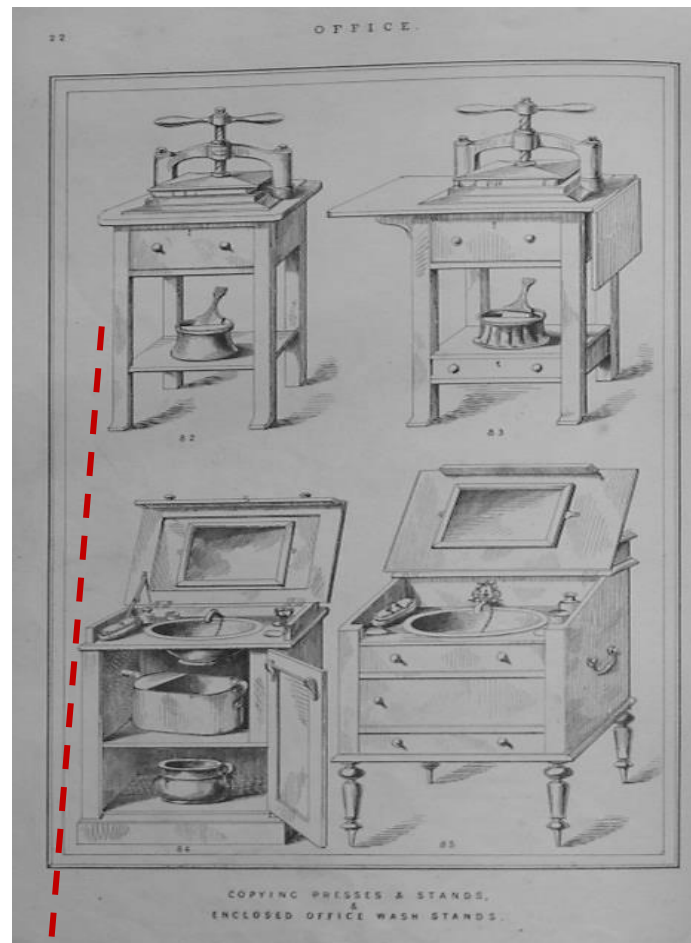

Figure 4.22 'Office Furniture', Jenks & Holt *Modern Furniture* (1869).

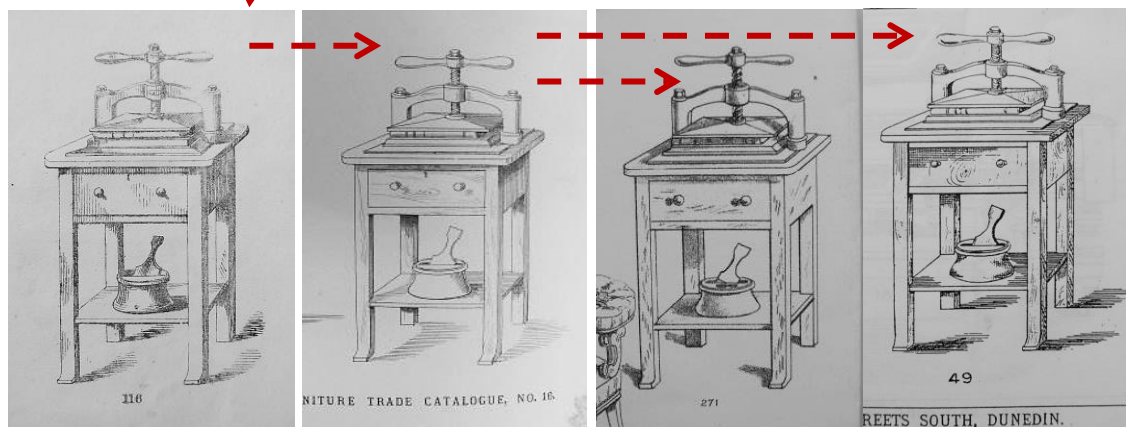

Figure 4.23. 'Stand for Copying Press' anastatically copied by Lister for Craig & Gillies' (1875) from the original Jenks & Holt design (1869) (*left*). The same design redrawn for the *Furniture Gazette* (1880) (*middle left*). Wyman's copy redrawn by Peter McIntyre for North & Scoullar (c.1883) (*middle right*). Wyman's copy redrawn by Herman Clarke for Thomson, Bridger & Co. (c.1887) (*right*).

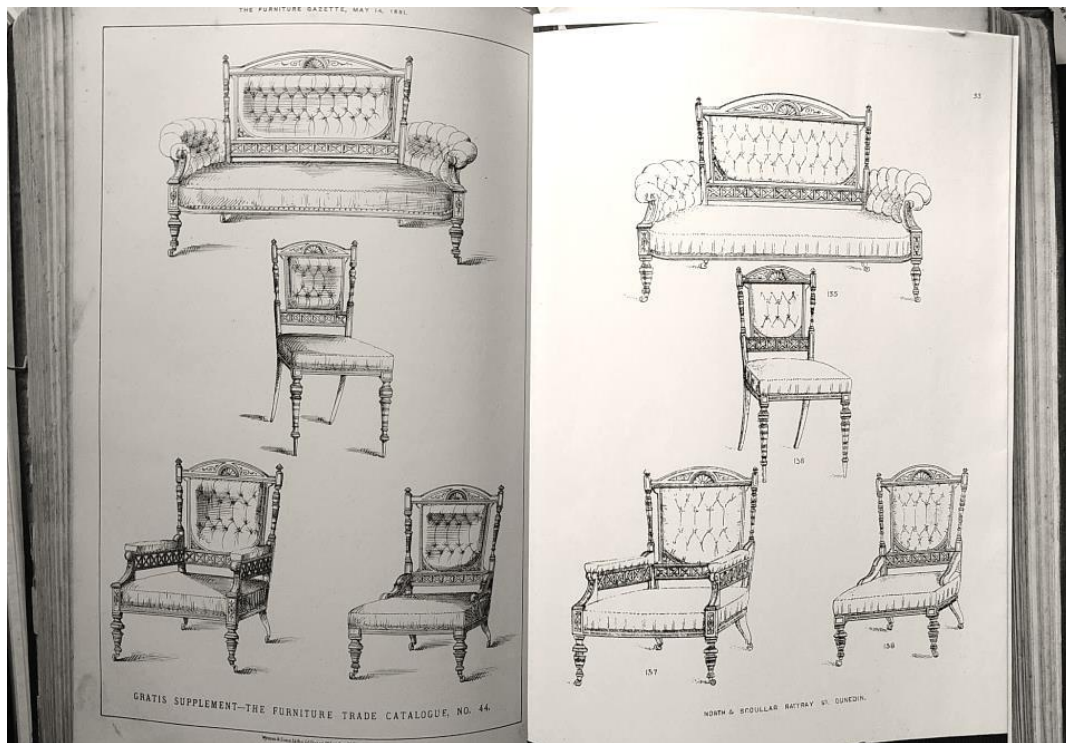

Figure 4.24. Wyman's *Furniture Gazette* made designs freely available to the cabinetmaking trade

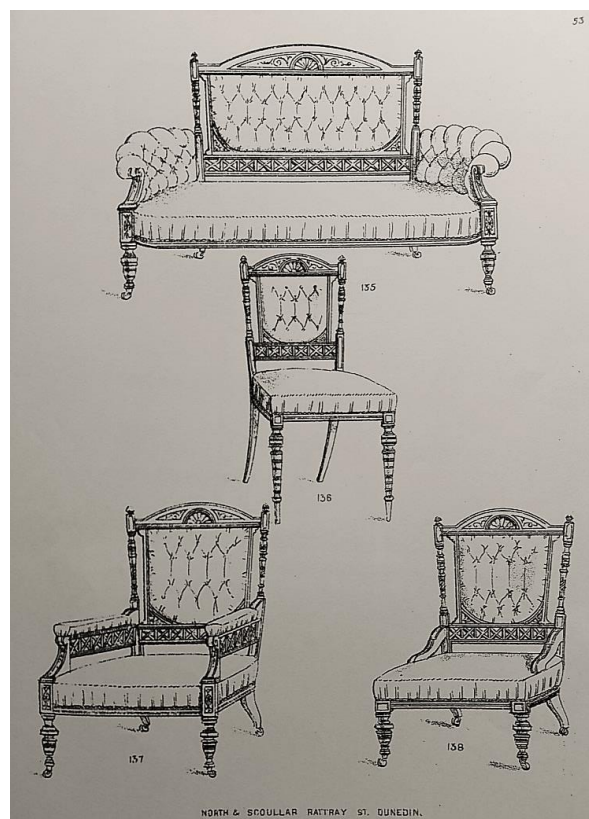

Figure 4.25. Wyman's *Furniture Gazette* designs redrawn by Peter McIntyre for North & Scoullar's *Illustrated Catalogue* (c.1883).

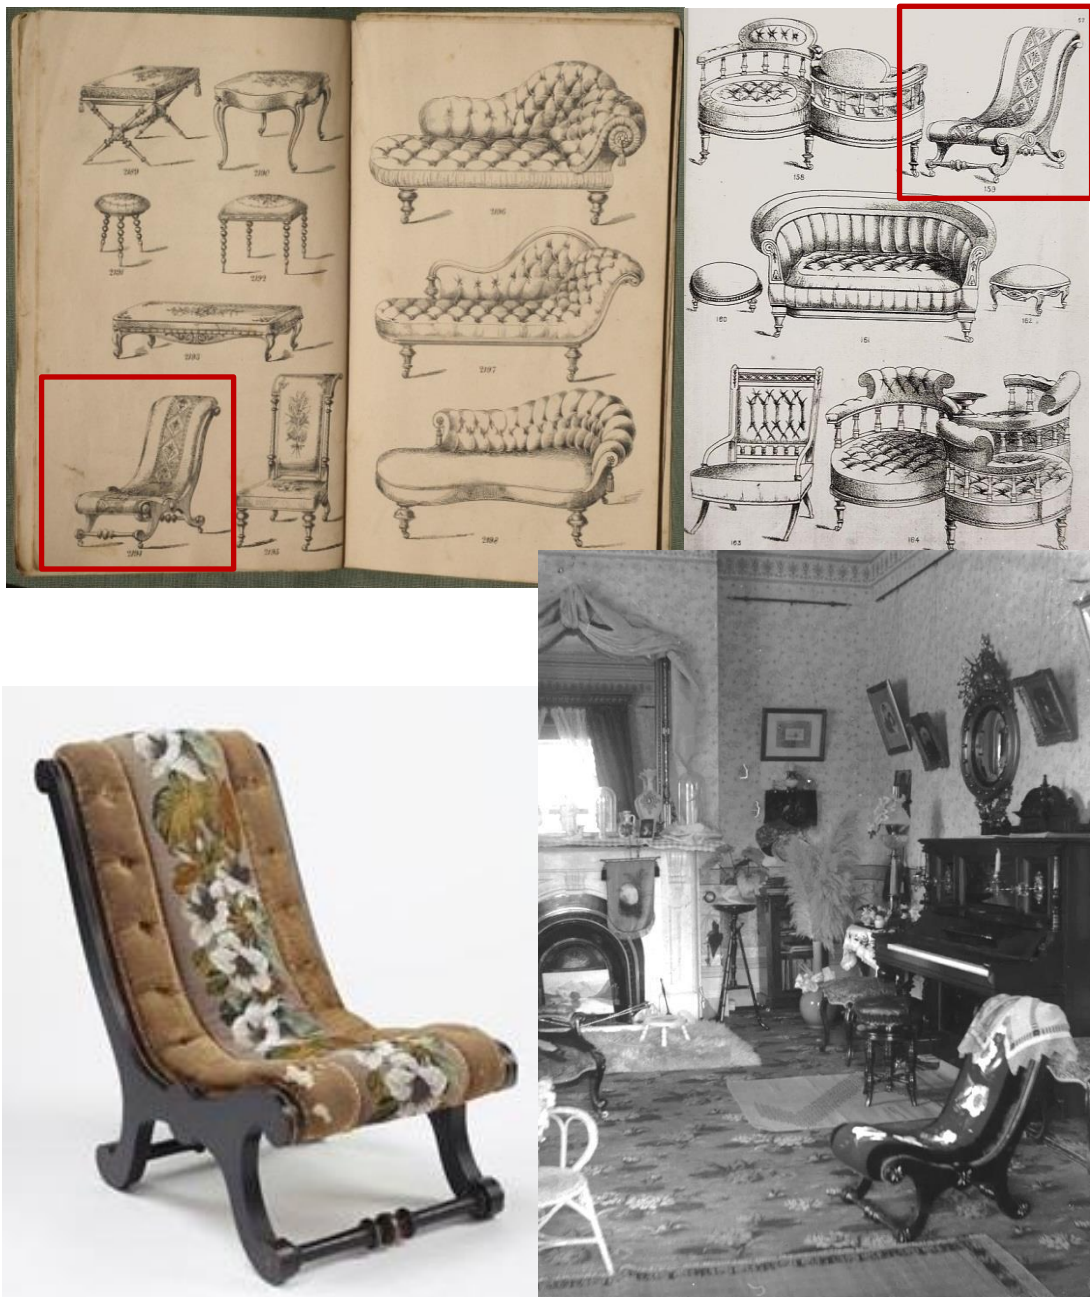

Figure 4.26. G. & H. Story *Designs of Furniture* (1865) pattern for a 'lady's chair' and North & Scoullar's later copy (c.1883) (top left & right). Scoullar & Chisholm's beadwork and ebonised kauri 'lady's chair' (c.1900) with a similar example in an Auckland drawing room (c.1900) (bottom left & right).
