Figure 5.4a: Proposed Landslide Hazard Zonation for the Greymouth Area

Hazard Zonation Classes

- | | | |
|---|------------|--|
|  | HIGH | Slope movements occurring within the last 50 years |
|  | MEDIUM | Slope movements showing no sign of activity in the last 50 years |
|  | LOW | Slope angle in excess of 15° with no history of slope movements |
|  | NEGLIGIBLE | Slope angle less than 15° no history of slope instability |
